

**Please be aware there could be sharp edges & corners. Wear suitable gloves.**

## **FLAT PACK GALVANISED COAL BUNKER & CORN / STORAGE BIN**

### **Parts List:**

Nuts & Bolts (taped to bottom section D)  
1 - Back with Lid attached (B)  
1 - Bottom Section (D)

2 - Side Sections (A)  
1 - Front Section (C) with sliding door (coal bunkers only)  
1 - Inner Top Frame (E)

### **Equipment Needed:**

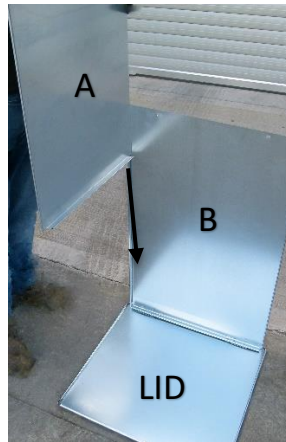

-Flat blade screwdriver  
-Spanner

### **ASSEMBLY INSTRUCTIONS**

*\* We recommend 2 people and suitable gloves for safe assembly and the bunker is positioned on a level surface \**

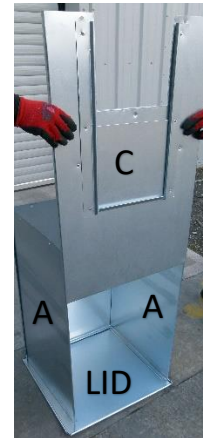

*\*\* The bunker will be assembled upside down \*\**

1. Using part B place lid flat on the floor with the back upright.

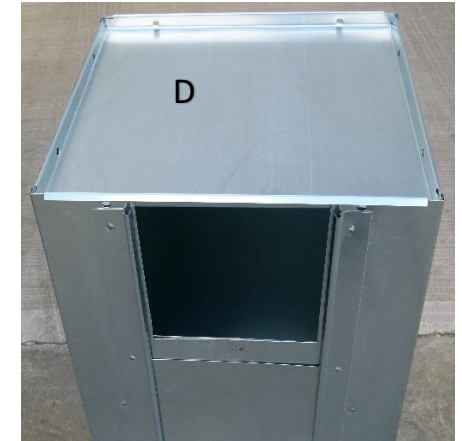

2. Slide the sides (A) into the folds with lipped edge first.

3. Slide in front section (C) with the door facing outwards.

*\*Ensure bunker door is in the runners in (c) before putting on bottom section (D)\**

4. Insert bottom section (D) so that the holes line up & the folds are over the edges.

**Fasten bottom firmly in place using nuts and bolts provided.**

**\*\*Turn bunker over\*\***

5. Put top frame (E) into bunker and pull up under top folds & bolt into place.

Tighten bolts with a screwdriver and spanner.

***Please note there is a fold at the top of the door runner on the front section, this is to stop the door coming out.***
